RECEIVED & INSPECTED
JUN 04 2007
FCC-MAILROOM

Dear Chairman: Thank you for your letter of June 1, 2007 regarding the VRS

and I am pleased to hear that the FCC staff is currently reviewing the VRS program. I am pleased to hear that the FCC staff is currently reviewing the VRS program. I am pleased to hear that the FCC staff is currently reviewing the VRS program.

I would like to see the VRS program expanded to include more deaf people. It is to improve the quality of service for deaf people who use VRS. I urge you to do everything you can to make sure that deaf people who currently do not have access to VRS have access to it.

The VRS program includes the following:

- Provide more deaf people with access to VRS by recruiting and training more deaf people.
- Provide more deaf people with access to VRS by recruiting and training more deaf people.
- Provide more deaf people with access to VRS by recruiting and training more deaf people.

I, along with other deaf individuals, deaf families and deaf organizations, depend on VRS and other relay services.

Please keep the VRS program open and fund the program in the future with Disabilities Act (ADA) to provide deaf people with equal access to communication services.

Sincerely,

Deanne Adlassonig

I, along with other deaf consumers, have used relay services.

Please stop any VRS program that does not comply with the Americans with Disabilities Act (ADA) to provide deaf people with relay services. We are requesting that you provide relay services.

Signed

Fredrick E. Hodgson
Alice J. Hodgson

ASL II- Extra Credit

May 24th

Dear Chairman Martin,
Commissioners Adelstein, Cupps,
McDowell, and Tate.

I'm an American Sign
Language student at Canas
High School. I was upset
when I learned that

the FCC staff is planning
on cutting the VRS rate
availability for the deaf.

The FCC should make VRS
available to the deaf, ~~even~~
no matter what it takes.

My understanding is
that there are many deaf
individuals who use the
VRS system for their work
and personal life. I'm very
concerned about what ~~the~~
deaf people will do without
VRS, so I'm urging you to
make the service more
available for the deaf.

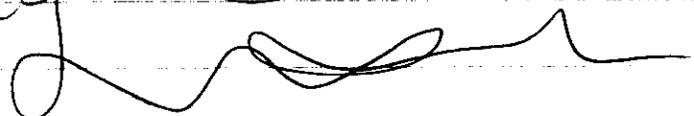

individuals who aren't fortunate enough to have the service.

The VRS rate should encourage the VRS providers to:

- serve more deaf people
- provide interpreter training programs
- provide service and technology improvements

I'm again urging you to stop any VRS program cuts. I feel that cutting VRS rates will not meet the Americans with Disabilities Act (ADA) requirement, which is to provide deaf people with functionally equivalent telecommunication services.

Sincerely,

Jessica Salaman,

RE: CG Docket No. 03-123
Federal Communications Commission (FCC)
445 Twelfth Street SW
Washington, DC 20554

Dear Chairman Martin, Commissioners Adelstein, Copps, McDowell, and Tate:

I am a deaf person and I use Video Relay Service (VRS) to communicate. I was appalled to learn that the FCC staff is intent on drastically cutting the VRS rate, and effectively cutting VRS availability for the deaf. Instead of seeking to limit the number of deaf people with VRS access, the FCC should do everything in its power to make VRS available to more deaf people.

I, along with other Deaf individuals, use these services in both my work and personal life. It is an important way in which I/we communicate with both hearing and deaf individuals. I urge you to do everything you can to make VRS service available to the many deaf people who currently do not have access to this vital, life-changing service.

The VRS rate should encourage the VRS providers to:

- Serve more deaf people, not discourage them from reaching out to more deaf people
- Provide interpreter training programs so that there will be an adequate number of qualified interpreters for VRS and the local Deaf communities
- Provide service and technology improvements, such as the development of new videophone equipment, fulfilling the Americans with Disabilities Act (ADA) mandate of functionally equivalent telecommunications services

I, along with other deaf individuals, their families and coworkers, depend on VRS and other relay services.

Please stop any VRS program cuts and fulfill the mandate of the Americans with Disabilities Act (ADA) to provide deaf people with functionally equivalent telecommunications services.

Sincerely,

RECEIVED & INSPECTED

May 23, 2001

Dear Chairman Martin, Commissioners Adelstein,
Coppes, McDowell, and Tate:

I am a junior, second year ASL student
at Camas High School and after hearing about
the FCC's intent on cutting the VRS rate and
VRS availability to the deaf, I was appalled.

The availability of VRS is not accessible for
all deaf people right now anyways. Many deaf
people go without VRS because they can't
afford to get high speed internet. If you
people are thinking about changing anything it
should be increasing not cutting rates. Have any of
you tried to experience being deaf for a day?

I highly doubt it, and for your information, I
have. It was one of the hardest things I have ever
dealt with, ~~it~~ even harder than varsity football
or baseball. You cannot simply pick up a phone to
call your friends, instead you must write down (most
hearing people can't sign) what you want to say and
hope you can rely on this person to be there every
day for you and tell what you said exactly. In
conclusion I strongly urge you to not cut spending
and availability, but instead increase it. Make a change!

Sincerely,
Casey McEnry

I, along with other deaf individuals, their families and co-workers, depend on VRS and other relay services.

Please stop any VRS program cuts and fulfil the mandate of the Americans with Disabilities Act (ADA) to provide deaf people with functionally equivalent telecommunications services.

Sincerely,

Jack Vickers

Dear Chairman Martin, Commissioners
Ackerstein, Copps, McDowell and Tzite:

I am an American Signlanguage student and recently learned that the FCC staff is cutting the Video Relay Service rates and also cutting the availability of it for the deaf. Just when VRS started to grow big the FCC is limiting access to it. Instead it should be making it more available to deaf people.

Many deaf people rely on the VRS to communicate. With this, the VRS should serve more people and provide technology improvements. I am asking you to stop any VRS cuts that are being made but instead provide as many deaf people with telecommunications services as possible.

Sincerely

~~Hannah Beardshear~~
